

Neuroscience is changing the way we understand and measure Personality

An exciting new breed of assessments that reflect modern neuroscientific thinking about personality have emerged. Understanding personality attributes in relation to plasticity and stability enables organisations to both recruit and upskill existing staff to be fit for the future.

CLICK HERE Watch this 3 minute video for what you need to know about the next generation of personality psychometrics

Plasticity  How people adapt to and engage with the world around them.

Stability  How people maintain stable relationships, motivation and emotional states.
